

Comprehensive Community Services

The agency is required to obtain a Wisconsin DHS certificate to provide comprehensive community services as authorized under HFS 36, Wis. Admin. Code (which meets Wisconsin Medicaid's HFS 105, Wis. Admin. Code, requirement).

Agencies that do not meet this criteria will qualify as a 'biller only' provider and will be allowed to bill for comprehensive community services. An allowable Medicaid rendering provider is required to perform the service.

The billing agency is required to have an agency resolution stating that the county or tribe agrees to make available the nonfederal share needed to provide comprehensive community services.
